Tech enthusiast, passionate about discovery and creation. The fusion of aesthetics and functionality in front-end development fascinates me. Throughout my years of study, I have developed a sense of prioritization to meet deadlines, a keen attention to detail, the importance of giving meaning to every aspect of my work, and placing people at the center of every decision to improve their daily lives.

WORK EXPERIENCE

2024:

Becode

- Learning programming languages
- Working on group and solo projects
- Project planning and design

Through this experience, I have developed my technical programming skills, strengthened my ability to work both in a team and independently, and gained solid project management experience.

SKILLS

HTML, CSS, React, Typescript, SASS, tailwind, PHP (laravel)

EDUCATION

2021-2023 :

Studies in Architecture at the University of Liège.

2020-2021:

Studies in Industrial Engineering Sciences at the Haute École de la Province de Liège.

2020:

CESS at the Institute of Sainte Marie de la Providence.
